Summary

Computer Science undergraduate building projects in Artificial Intelligence, Machine Learning, and software development with hands-on experience in Natural Language Processing, Computer Vision, Generative AI, and data analytics using Python, PyTorch, Transformers, and Flask. Natural problem solver with an emphasis on developing practical solutions and continuous learning through real-world projects. Strong foundation in Data Structures, programming, and backend development with a focus on building scalable and impactful technology solutions.

Education

GITAM University 2023–2027
B.Tech in Computer Science Engineering (AI & ML)
CGPA: 7.40

Internship

Artificial Intelligence Intern - Tekisho Pvt. Ltd. May 2026 – June 2026

- Built AI-powered applications using Generative AI, NLP, Speech Recognition, Prompt Engineering, and Full-Stack Development.
- Participated in software documentation, testing, and deployment during project delivery.

Projects

TwinAI – AI-Powered Communication Intelligence Platform GitHub

- Developed an AI-powered communication coaching platform for presentations, interviews, debates, and public speaking.
- Integrated Groq Whisper for speech transcription and GPT-OSS-120B for AI evaluation and feedback.
- Built JAM Analyzer, Interview Simulator, Debate Arena, Document Communication Analyzer, and Communication DNA.
- **Tech Stack:** Next.js, React, Tailwind CSS, FastAPI, PostgreSQL, Groq Whisper, GPT-OSS-120B, OpenCV, MediaPipe, JWT.

Ai-Dashboard GitHub

- Built an AI-powered workspace that brings together notes, tasks, documents, and smart assistance, making it easier to organize and manage daily work.
- Designed a clean, responsive dashboard with secure authentication, real-time updates, and an intuitive interface across devices.
- Integrated AI-powered document summarization, semantic search, and personalized recommendations to improve productivity.
- **Tech Stack:** Next.js 15, React 19, TypeScript, Tailwind CSS, FastAPI, PostgreSQL, Supabase, Redis, LangChain, Gemini AI, Docker, JWT Authentication, REST APIs.

Skills

Languages: Python, C, SQL, JavaScript
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend: FastAPI, Flask, REST APIs
AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, Prompt Engineering, Transformers
Libraries: PyTorch, TensorFlow/Keras, NumPy, Pandas, Scikit-Learn, Matplotlib, OpenCV
Tools: Git, GitHub, Postman, VS Code
Core Concepts: DSA, DBMS, OOPs, Operating Systems, Computer Networks
